Winter Service 2009/10

Your machinery is in good hands

October 2009 - March 2010

Need experienced trained mechanics to service your machinery?

Allow us to help with our out of season winter service, on all your valued farm equipment.

We will carry out a full service as per manufacturers schedule and any repairs or insurance work necessary.

A full **FREE OF CHARGE** estimate would be prepared if requested on any repairs outside of normal servicing.

• **20% OFF LABOUR**

25% OFF ANY 5 FILTERS USED •

• **15% OFF ANY 20ltr OF OIL USED**

15% OFF PARTS •

Tractors

Allow us to keep them in good working order over the winter. We will carry out a full service to your tractor, changing oil and filters as necessary.

We will check the charging system, battery and the coolant system for the correct level of anti-freeze.

Combines

Whilst your combine is standing idle throughout the winter, allow us to carry out a full winter service or any repairs.

Possibly the insurance work you had over looked in preparation for next seasons harvesting.

Balers

Big square, small square or round. Despite having no engines they have a lot of chains, belts and bearings all possibly in a state of disrepair. Allow us to prepare you for next years harvest by doing a full winter service on your machine

Telehandlers

These machines work 365 days a year. A breakdown at any time of the year is inconvenient, but during busy feeding time its a nightmare. Allow our factory trained engineers to help prepare for the cold winter days by having you machine fully serviced.

Quad Bikes

These are small but hard working machines. Allow us to carry out a full service on your bike checking drive shafts, bearings, oils and brakes.

Has your handler had its annual safety check?

Better safe than sorry, get CITS accreditation.

All our staff are factory trained with up to date service information.
