

## Revolutionising ATV & Asset Security

A discreet ATV and asset tracker that monitors the movements of your machinery in real-time, allowing you to view status and location history 24/7 with notification of unauthorised movements.

[www.atvtrac.co.uk](http://www.atvtrac.co.uk)

### So how does it work?

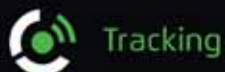

#### Installation

Through our experienced dealer network, your unit will be professionally and covertly installed, with true peace of mind.

#### Registration

Once your device is registered and SUBSCRIBED you will be protected within minutes.

#### Tracking

Once you've registered you can log-in 24/7 to check your assets real-time location, battery level, journey history and more.

We are Thatcham 6 & 7 approved

We were the first vehicle tracker on the market to achieve 6 and 7 ratings from Thatcham. What does it mean? It means we protect on multiple levels. Cat 6 is what most rivals offer with GPS based systems. We've gone further with radio frequency detection in our unit too, giving you the ultimate level of protection and us the coveted Cat 7 rating.

### Who Are ATVTrack?

Part of Bike Trac Ltd, ATVTrac managed by the very same guys that dreamed up the concept of Live Motorcycle Tracking and Recovery. ATVTrac has been developed to focus on ATV, Side by Side and Machinery found in our rural environment. With a new look and some exciting new developments on the horizon, our core values remain the same.

### What Can We Protect?

ATVTrac doesn't just protect ATVs, we specialise in asset protection for farmers, estate managers and builders too. As well as ATV and Side-by-side machinery, ATVTrac can protect tractors, trailers, generators and practically any asset that isn't tied down.

### NFU Mutual Discount

ATVTrac devices receive a 12.5% discount with a valid NFU Mutual agricultural insurance policy.

ATVTrac is endorsed by

## Key Features

### Stealth Installation

All authorised ATVTrac dealers are trained to ensure that your unit is installed in the most covert location possible, giving the best levels of protection and adhering to Thatcham's high security standards - it's essential.

### Self Maintaining

ATVTrac has its own internal battery, so it doesn't rely solely on the machine's own battery for power. If it detects a drop in the machine's voltage, you'll receive a helpful text to tell you so. The internal battery lasts for up to 30 days.

### 24-7 Operations Center

Our secure operating centre doesn't sleep, so you're protected 24 hours a day, seven days a week. If the unthinkable happens, our team contact you via text, phone and email and then liaise directly with the authorities to pinpoint your machine.

### Real-time Monitoring

Once you've registered your ATVTrac unit you have total control, 24/7. Edit your details, add co-workers for notifications and even select the voltage threshold for receiving low battery notifications. Sending a lone-worker out on a remote job? Keep an eye on their location for peace of mind or send your nearest machine to the next job by monitoring more than one tracked machine on the app.

### ATV Over Alerts

Ideal for lone workers, ATVTrac will notify your contacts automatically if the unit detects that the machine is over.

### Records Journeys

Journeys are logged on ATVTrac's interactive map so you can log in, view and share the routes that you have taken and get detailed information such as distance and time.

## How much does ATVTrac cost?

ATVTrac has a one off purchase price which includes the first year's subscription. After the first year you can select from the multi-year options which offer significant discounts or pay monthly. All prices inclusive of VAT. Installation costs are subject to local dealer labour rates and are charged separately by your dealer.
